DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support for the limitation that the feed rate of the glass pipe is faster than that of the glass rod. Examiner could find no explicit support for this limitation in the disclosure as filed. And there appears to be no implicit support; see prior Office action of 8/8/06.

Response to Arguments

Applicant's arguments filed 12/08/06 have been fully considered but they are not persuasive.

It is argued that there are typographical errors in the response of November 18, 2005. There is no statement of what the actual errors are, nor any evidence that they

Art Unit: 1731

actually are errors. Corrections are asserted in the present arguments, there is no evidence to support that they are appropriate corrections.

From MPEP 2145 Consideration of Applicant's Rebuttal Arguments

I. ARGUMENT DOES NOT REPLACE EVIDENCE WHERE EVIDENCE IS NECESSARY

Attorney argument is not evidence unless it is an admission, in which case, an examiner may use the admission in making a rejection. See MPEP § 2129 and § 2144.03 for a discussion of admissions as prior art.

The arguments of counsel cannot take the place of evidence in the record. In re Schulze, 346 F.2d 600, 602, 145 USPQ 716, 718 (CCPA 1965); In re Geisler, 116 F.3d 1465, 43 USPQ2d 1362 (Fed. Cir. 1997) ("An assertion of what seems to follow from common experience is just attorney argument and not the kind of factual evidence that is required to rebut a prima facie case of obviousness."). See MPEP § 716.01(c) for examples of attorney statements which are not evidence and which must be supported by an appropriate affidavit or declaration.

In other words: Applicant's statements of 18 November 2005 are considered to be evidence used to support the rejection. Mere argument by applicant cannot overcome this evidence.

Applicant requests clarification regarding the statement of item 5) in the 8/8/2006 response. The statement was that using d2 and D2 Examiner found "that the ratios are the same". Applicant wanted clarification as to which ratios Examiner was referring to. Examiner's comment was directed to Applicant's comments of the second paragraph on page 4 of the 5/1/06 response. In that paragraph applicant refers to the "magnitude relationship between" two ratios – these are the ratios that Examiner was referring to. Applicant indicates that the relationship "is considered". Applicant's arguments does not discuss this *consideration*. Examiner did consider the data and discovered they are

Art Unit: 1731

equal – and thus the feed rates are equal. Thus there is no force to Applicant's assertion that one is larger than the other.

To summarize: The Office has made a *prima facie* showing that the written description requirement was not complied with – and thus the burden was on applicant to show the requirement was complied with. In an attempt to meet the burden applicant indicates that the "magnitude relationship" should be considered but does not do the analysis/consideration. Examiner did the consideration and found the results do not support Applicant's conclusion. The Office was under no obligation to provide a consideration – rather Examiner was just trying to find out if Applicant could have been correct in the implied *consideration*.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
